

# AVSEC Testing Tools and Techniques

**Each participant will receive an e-Book of AVSEC Testing Tools**

**The target population will be all security personnel performing AVSEC Operational Testing Techniques at Airports and Aircraft.**

## Course purpose:

On completion of this course participants will be expected to be familiar with:

- \* Conducting Operational Testing at Airports and Aircraft
- \* Using a variety of Testing regimes and methodology
- \* Using appropriate techniques for different areas in the Airport

**The course has been designed to enable participants to be conversant with the AVSEC Testing Tools and Techniques and how they are to meet Annex 17 requirements.**

## Key topics that will be covered include:

- \* Security testing concepts
- \* Covert testing using simulated test objects
- \* Roles of the PFSO
- \* Corrective action plan
- \* Documenting testing results
- \* Procedures on preparing for testing
- \* After action review
- \* Code of conduct for testers
- \* Reporting
- \* Testing for different areas and scenarios
- \* Methods for aircraft security testing
- \* Testing security screeners

## Facilitator - Mr. Zainal Abidin

Zainal holds a Bachelors Degree of Arts in English with Management from the UK Open University. Zainal is also a certified ICAO national Inspector with extensive training experience in the field of Aviation Security.

He started his career with the Singapore Police Force and left as a Senior Station Inspector after 28 years, spending a good number of those years in Airport Police Division. Zainal joined Changi Airport Group (CAG) as their Manager of Aviation Security Unit in 2010 and spent 12 years with the organizations. He has more than 16 years experience in all aspects of Aviation Security.
